## Skills

---

### Software

Javascript, Node.js, React, MySQL,  
MongoDB, ExpressJS, Python

### Tools

Jira, Confluence, Git, Postman  
Splunk, Kali Linux, AWS Cloud

## EDUCATION

---

**CompTIA Security+ Course, UDEMY**  
Certificate of Completion

**2022**

**Full Stack Web Developer Boot Camp - UCF**  
Certificate of Completion

**2021**

**Temple University, Philadelphia, PA**  
Bachelor's of Science: Film and Media

**2015**

## EMPLOYMENT HISTORY

---

### Application Developer - BKON

**2021 – Current**

- Recognized critical need within organization to bridge gap between maintenance and production systems and designed in house application to bridge gap. Ultimately labeled as key initiative by leadership and green lit for implementation.
- Scoped project using agile methodology and provided a summary to management, showing path for implementation and improvement roadmap.
- Lead all aspects of implementation and design including UX/UI, Database structure, and ensuring proper communication/ notifications sent.
- Researched platforms and frameworks for project ultimately deciding on Sharepoint/MS Power Apps for implementation. Although experience primarily with python, considerations made with idea that maintenance should be easy and interface should leverage existing resources available in environment.

### Head Brewer - BKON

**2021 – Current**

- Implemented Safety and Sanitation controls handoff and checklists in role. Designed controls to ensure the proper measurement and standards around the cleaning and sanitize of all equipment needed for transfers before and after the transfer is complete.
- Managed, reviewed, analyzed, and entered data ensuring quality of each brew, identified outlying numbers correcting the brew system when need be.
- Increased efficiency which lead to a minimum of a 12% increase to production yields.

## PERSONAL PROJECTS

---

Memory Game, [LINK GITHUB](#)

**2022**

**Skills** - React, Javascript ES6, Heroku

- An application created by using Create React App
- The application renders different images to the screen with click events
- Created the user experience that fetched, parsed, and formatted analytic data, and relayed it into React components.
- Monitored interface software and debugged application code.

Chicken Tender, [LINK GITHUB](#)

**2021**

**Skills** - API, Javascript, HTML/CSS

- I Built and designed layout of pages, icons, buttons,
- Created user interaction with event listeners to capture user input
- Built application using asynchronous programming to accommodate for the lag between the called function and when the function is returned
