PERSONAL PROJECTS

Memory Game, LINK GITHUB   2022
Skills - *React, Javascript ES6, Heroku*
- An application created by using Create React App
- The application renders different images to the screen with click events
- Created the user experience that fetched, parsed, and formatted analytic data, and relayed it into React components.
- Monitored interface software and debugged application code.

Drummer Search, LINK GITHUB   2021
Skills - *Node.Js, Express, Javascript*
- Built application using JavaScript and Express.
- Utilized API routes, package JSON, and Bootstrap for functionality and design.
- Created accessible, responsive, and functional user interfaces to allow visitors on any device to have the same perfect user experience.

TV Show Search, LINK GITHUB   2021
Skills - *API, Javascript, HTML/CSS*
- Implemented an API through Javascript to render television shows to an HTML page.
- Created user interaction with event listeners to capture user input
- Built application using asynchronous programming to accommodate for the lag between the called function and when the function is returned

EMPLOYMENT HISTORY

Application Developer / Lead Brewer - BKON   2021 – Current
- Built and designed an application connecting maintenance to production.
- Determined goals of the project and chose proper methods in executing the application.
- Created UI/UX interface for ease of use in filling out forms, updating databases, and implemented the application to send emails to the proper receivers.
- Utilized Sharepoint Lists and Excel to be used with Power Apps

Cellar Hand - Crooked Can Brewing Company   2019 – 2021
- Ensure quality and fermentation of beer by dry hopping, yeast pitch/ dumps, burps, daily gravity readings, transferring into clean brite tanks or barrels, carbonate, keg, keg wash, and bottling of barrel aged beer
- Clean and sanitize fermentation and conditioning tanks through CIP. Clean and sanitize all equipment needed for transfers before and after the transfer is complete.
- Harvest yeast when needed when needed and check the health of the yeast through cell counts.

Canning Line Operator - West Sixth Brewing   2018 – 2019
- Set-Up, operated, monitored, and performed troubleshooting tasks for automatic test equipment
- Met and exceeded quality standards, continuously seeking ways to improve the process and product
- Sanitized all equipment before production while practicing and following all safety procedures and wearing proper PPE.
- Practice proper safety around the line by clearing dropped cans, keeping the area free of debris and properly stopping the line when issues arise.

EDUCATION

Full Stack Web Developer Boot Camp - UCF   2021
Skills - Javascript, Node.js, React, MySQL, MongoDB

Temple University, Philadelphia, PA   2015
Bachelor's of Science: Film and Media
